

SPH MEDICAL **AIR TRANSFER MATTRESS** **SINGLE PATIENT USE**

WHAT IS THE SPU AIR TRANSFER MATTRESS?

The SPH Medical Single Patient Use transfer mat is the highest quality disposable transfer mat on the market, offering exceptional cost-effectiveness and economy – just what you'd expect from the Safe Patient Handling experts at SPH Medical!

Double stitching on all seams and handles mean that the safety of the SPH Medical Transfer Mat is exceptional. No welding or heat sealed edges that could fall apart like other brands.

Thorough pressure mapping and breathability testing have been performed to ensure that the SPH Medical Single Patient Use Air Transfer Mat can stay under patients for extended periods to improve staff safety.

Widths available: 34", 39", 50", 34" Short, 39" Short

WHY USE THE SPU AIR TRANSFER SYSTEM?

- Compatible with your current air supply/blower.

- Improves patient comfort & safety
- Helps prevent injuries to patients and caregivers
- Single use, affordable, disposable mattress
- Reduces shear force during transfer
- Available in four sizes for all types of patients
- Single patient use – supports infection prevention protocols
- Enhanced breathability for all day patient care

SPH MEDICAL

BREATHABLE REPOSITIONING SHEET SINGLE PATIENT USE

WHY USE THE SPU BREATHABLE REPOSITIONING SHEET?

- Six lift straps on either side of the sheet
- Three sizes available
- SWL: 1000 lbs capacity
- Disposable material for optimal hygiene and safety
- No measurable increase in pressure over standard bed linen
- Pressure mapped and breathability tested

WHAT IS A BREATHABLE REPOSITIONING SHEET?

The SPH Medical Breathable Repositioning Sheet disposable, is a patient specific positioning sheet for short-term use and for patients weighing up to max 1000 lbs. Also known as the PositioningSling, it is made of a soft and durable non-woven breathable material. Instead of laundering, the disposable repositioning sheet is discarded after use, when it becomes soiled or when the patient no longer needs it. This prevents the spread of MRSA, C-Diff and other types of pathogens.

The SPH Medical repositioning sheet is made with an advanced breathable material and are available in several sizes to suit different patients and situations.

SPH MEDICAL **DISPOSABLE SLINGS,** **SHEETS, & AIR MATS** **SINGLE PATIENT USE**

THORAXSLING WITH SEAT SUPPORT

ThoraxSling, with seat support is a specially adapted and comfortable sit-to-stand vest which provides a very gentle sit-to-stand experience.

HANDICARE UNIVERSAL DISPOSABLE HIGHBACK SLING

This product is designed for single person, short term use. Since each patient has their own unique sling the increased risk of inherent cross-contamination in multiple patients is eliminated.

MEDCARE DISPOSABLE CARE SLING WITH HEAD SUPPORT

Take care with the ever-popular Medcare Care Sling. Designed to fit the needs of most patients, it also includes a version with head support to protect patients with weak or poor head control.

SIT TO STAND DISPOSABLE BELT

The Medcare Care Stand Belt is for weight-bearing patients who have more consistent and reliable motor functions. It's the first and only sit-to-stand belt with Microban antimicrobial product protection.

TRI-TURNER SLING DISPOSABLE

For turning a user into a lateral resting position, the Tri-Turner Sling is easy to use and provides safety, comfort and proper support, one turn after another.

MEDCARE DISPOSABLE CARE SLING

Take care with the Medcare Care Sling. Designed to fit the needs of most patients, it also includes a version with head support to protect patients with weak or poor head control.

BAND SLING FOR LIMB HOLDING

There's no doubt, caregivers and medical professionals all over find the Band Sling ideal for lifting and supporting limbs whether for changing dressings or performing surgery.

DISPOSABLE FACE REST COVERS FOR EPD

SPH Medical's Disposable Face Rest Covers are used to protect the face cushion on the EPD. This disposable cover protects the vinyl and the patient's face to keep them free from germs and bacteria.

LIMBSLING DISPOSABLE

LimbSling is a lift strap designed to comfortably and conveniently assist lifting of a patient's leg or arm, to get better access for treatment and dressing wounds. This is one of the many single patient use slings that are available through SPH Medical.
